Connect Wix

Let your helper read and help with a Wix site. You stay in charge of every change.

Kind Walkthrough | Changed 2026-11-04 | For Anyone who manages a Wix site

You are here: drasticstatic lab › `my-template` › `walkthroughs` › `CONNECT-WIX.md` · public · `main` is the working branch

TL;DR

1. **The Wix MCP is Wix's own official connection for AI helpers.** Once connected, your helper can:
2. search Wix's documentation;
3. read your site's content and business data (blog, bookings, events, CMS collections, store);
4. help you make changes.
5. **You stay in charge:** start by asking it to *read and suggest*, and approve any change yourself.

> ***Handing this to your AI helper?*** *Say: "Read CONNECT-WIX.md and help me connect my Wix site to you. Begin read-only: show me what you can see before you change anything."*

Pick your helper

ChatGPT

1. Open the official **Wix plugin for ChatGPT**: https://chatgpt.com/plugins/plugin_asdk_app_6947eaa4edd081919561e4ee3a2e5dcc
2. Select **Connect** and sign in with the Wix account that manages your site.
3. In any chat, tag **@wix**: *"@wix list the pages on my site and the date each was last updated."*

Tip: keep Wix work inside your organization's ChatGPT **Project**, so it sits beside your other site notes.

Claude (web and desktop)

1. Open **Settings** → **Connectors** and find the built-in **Wix** connector.
2. Select **Connect** and sign in with your Wix account.
3. Ask: *"Using Wix, show me my blog posts from this year."*

Claude Code, Cursor and other code tools

Add Wix's hosted server to the tool's MCP settings (for Claude Code: `~/.claude.json`, under `"mcpServers"`):

```
{
  "mcpServers": {
    "wix-mcp-remote": {
      "type": "http",
      "url": "https://mcp.wix.com/mcp"
    }
  }
}
```

The first time it's used, Wix asks you to sign in. Restart the tool, then check that it's connected.

Good first requests

- *"@wix list every page on my site with its address. Mark the ones that link to the retreat portal."*
- *"@wix show me the FAQ page's text, and suggest clearer wording. Don't change it yet."*
- *"@wix which pages haven't been updated this year?"*
- *"Compare my Wix FAQ with the FAQ on our retreat portal and list the differences."*

Safety, in plain words

- **Read first, write second.** Ask your helper to show you a change before making it. Wix's own guidance: treat reviewing what the AI suggests as your responsibility.
- **Use the account that should be making changes.** If several people manage the site, decide together who connects it.
- **Nothing private goes on a public page.** The same never-publish rule as the GitHub sites applies here.

Suggest a change

Noticed something wrong, or know a better way? Open an issue or a pull request against `main`; the lab steward reads them, and a person with the role merges with a merge commit so your name stays on it. Not on GitHub? Tell any steward you know, or your helper, in your own words.
